

Digital Health Solutions:

DRIVING BETTER HEALTH DECISIONS

Around the world, too many people are making health decisions without access to the right information. **Better use of better data improves health care systems at every level.**

MOTHER & CHILD NEED CARE.

- ▶ Will Mother know to go to the clinic at the right time?
- ▶ Will health workers be able to find patient records?
- ▶ Will the right vaccines and medicines be in stock?

The answers depend on accessing and using quality information. With proper products, support, and training ...

▶ Health workers can better track and manage supplies, deliver services, and treat patients.

▶ Administrators can target supplies and staff to the areas that need them most.

▶ Policymakers can monitor and measure health impact ...

... and use current evidence to budget and plan accordingly.

**WHEN THE RIGHT INFORMATION IS IN THE RIGHT HANDS,
EVERY COUNTRY CAN OVERCOME ITS HEALTH CHALLENGES,
AND MORE PEOPLE CAN GET THE CARE THEY NEED.**

PATH IMPROVES HEALTH CARE SYSTEMS THROUGH:

PEOPLE

Working alongside care providers and patients at all levels of the health system, focusing on their needs and goals.

PRODUCTS

Identifying and tailoring appropriate information and communication technology solutions.

PRACTICES & POLICIES

Supporting digital health governance, data quality, and use for decision-making.

PACKAGING

Combining practices and products so they can be scaled and replicated in other regions and countries.
