For questions 11-16 circle the correct response, either True or False.		
10. True / False The condom is the only method that prevents both pregnancy and HIV. (1 point)		1
11. True / False Depo IM and Sayana Press have the same active drug, and are equally effective at preventing pregnancy. (1 point)		1
12. True / False It is acceptable for a client who received Depo IM at her last injection to get Sayana Press for her next injection. (1 point)		1
13. True / False After stopping Sayana Press, it takes some time before fertility returns, but most women will be able to become pregnant about 10-12 months after their last injection. (1 point)		1
14. True / False If the provider sees any liquid medication remaining in the reservoir, the injection will not be effective. (1 point) It is okay if a small amount of liquid remains in the reservoir.		1
15. True / False It is safe for women who are breastfeeding to use Sayana Press when their baby is at least 6 weeks old. (1 point)		1
16. True / False A client only needs counseling before their first injection with Sayana Press. (1 point) Clients should receive counseling at every injection.		1
A recommended passing score is 80% or better, or a minimum of 20 points correct out of 25 points possible.	Total Score	25
	Total possible	25
	Percent	100%

Directions to the trainer:

Write the number of points scored for each question in the score column to the right of the question. Note that several questions are worth more than one point and that the trainee can get partial credit for ticking some of the correct responses. Write the total score for the post-training evaluation on the total score line and use the total possible score of 25 to calculate the percent correct. A recommended passing score is 80% (20 points) or better.
