

Reaching Impact, Saturation and Epidemic Control (RISE)

PRE- TRAINING ASSESSMENT FORM

PARTICIPANT HANDOUT- 1.3.1

Tick (✓) the correct option.

1. What should be the purity of medical oxygen administered to COVID-19 patients?
 - a) 80%
 - b) 85%
 - c) 90%
 - d) 96%
2. Which of the following is not an objective of oxygen therapy?
 - a) Correct lung fibrosis
 - b) Correct documented or suspected hypoxemia
 - c) Decrease the symptoms associated with chronic hypoxemia
 - d) Decrease the workload hypoxemia imposes on the cardiopulmonary system
3. Oxygen therapy is needed to cater the needs at which level of healthcare system
 - a) Primary
 - b) Secondary
 - c) Tertiary
 - d) All the above
4. Which of the following is not the source of medical oxygen?
 - a) Oxygen concentrator
 - b) Ventilator
 - c) Oxygen cylinder
 - d) PSA/VSA/VPSA Plant
 - e) Liquid medical oxygen (ASU plant)
5. Liquid oxygen is less concentrated and hence can only be stored in larger tank to ensure continuous supply at high pressure.
 - a) True
 - b) False
6. Which of the following is a high flow oxygen device?
 - a) Nasal catheter
 - b) Non-rebreathing mask
 - c) Venturi mask
 - d) Oxygen tent

and Epidemic Control

7. Choose the correct color code for oxygen gas cylinder
 - a) Yellow
 - b) Black
 - c) White
 - d) Red
8. Use of humidifier will not be recommended when
 - a) Cold oxygen is delivered
 - b) Delivering oxygen at higher than standard flow rates
 - c) Methods of oxygen bypass the nose
 - d) Delivering oxygen at relatively low flow rates
9. Which of the following solutions should not be used for decontamination of oxygen therapy devices?
 - a) Peracetic acid
 - b) Sodium hypochlorite
 - c) Stabilized hydrogen peroxide
 - d) Acetone
10. Which of the following factors are responsible for oxygen wastage?
 - a) Faulty valves
 - b) Washer not properly placed
 - c) Improper maintenance of dura cylinder
 - d) Using high flow nasal oxygen
 - e) All of the above
