

# WARNING

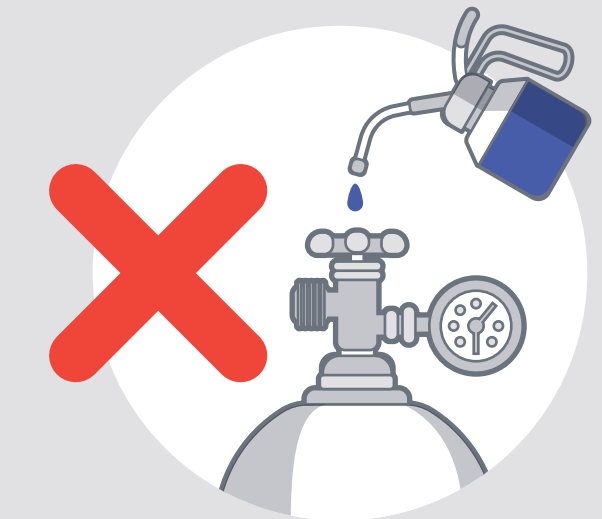

OXYGEN I.P. (2018)  
GAS CYLINDER RULES 2016

Do not fill the gas cylinder with any gas other than the one it contains.

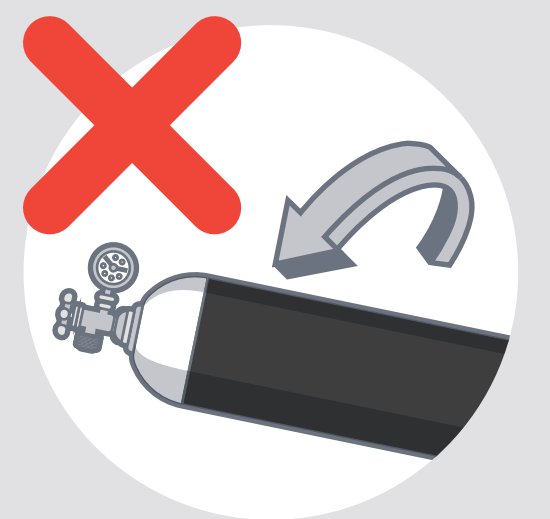

Do not change the colour of the gas cylinder.

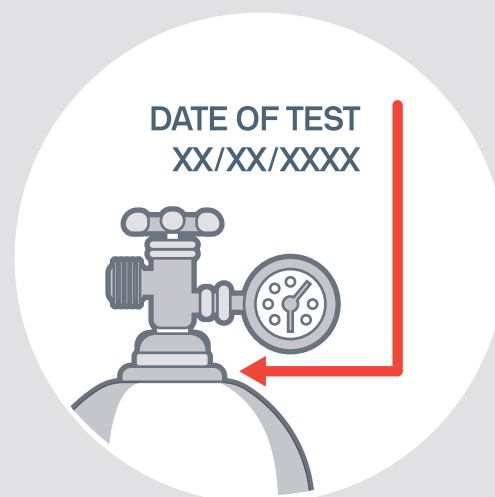

Do not use oil-based lubricant on the valves or other fittings of the gas cylinder.

Always use valve guards (caps) while handling or transporting gas cylinders.

Do not roll gas cylinders on ground.

Please look for the next date of test, which is marked on a metal ring inserted between the valve and the neck of the cylinder, and if the date has expired, do not accept the cylinder for filling.

Do not store any inflammable material in the immediate vicinity of a gas cylinder or in the same room where the gas cylinder(s) is/are kept.
