AFRICA REGIONAL MNCH ADVOCACY SERIES VIRTUAL EVENT PART 2

Tools for advancing maternal, newborn and child health (MNCH) advocacy and accountability from subnational to global levels
Our partners

Special thanks to the speakers and partners who joined us in planning this session of our Africa regional MNCH advocacy dialogue series.
Session objectives

• Expand the capacity of participants in interacting with and utilizing different types of tools for MNCH related advocacy and accountability.

• Gain familiarity with a new set of tools that can be used for advancing accountability and advocacy at country, regional and global level.

• Strengthen alignment on advocacy priorities and coordination of MNCH advocacy partners towards improved MNCH outcomes at regional level.

Africa advocacy briefs: Formation of a task team

• According to the 2023 ENAP/EPMM progress report, progress towards reduced maternal, newborn and child mortality rate has been lagging in the last decade.

• In 2020, relevant stakeholders and partners developed the ENAP/EPMM’s 2025 coverage targets for global, national and subnational levels.

• A resolution led by African countries was adopted during the 77th World Health Assembly addressing the need to accelerate progress.

• PATH is developing advocacy briefs with a focus on the African region, Uganda, Kenya, Zambia, and Nigeria which seek to:
  o Analyze the Africa region’s progress towards the 2025 coverage targets.
  o Call for a renewed commitment to the political pledges made at the highest levels to accelerate progress, improve maternal and newborn survival, and prevent stillbirths as we strive to achieve the Sustainable Development Goals.

To request to join the task team and for any questions contact:

Pasqueline Njau panjau@path.org.
