CCEM 2 - Installation Instructions

System requirements for CCEM 2 to operate on a personal computer include a minimum RAM of 1.0 GHz and at least 500 Mb of free hard disk space. CCEM 2 runs most efficiently with the Windows XP operating system (Service Pack 2 or later) and requires MS Access 2007.

It is important that all data are entered into the same CCEM 2.accdb file at a national or if implemented in a decentralized system, at a sub-national level. Data files from a sub-national database can be sent to the national data manager to maintain a national inventory if a centralized system is implemented. Please see the CCEM 2 User Manual for more information on decentralized CCEM 2 implementation.

The following six MS Access files are mandatory and must reside in the same folder for successful execution of the CCEM 2 tool:

File name	Description
CCEM 2.accdb	Includes the main database file and the modeling and reporting
	functionalities of the CCEM 2 Tool.
	When exploring the functionalities of the CCEM tool using a practice
	dataset, the CCEM 2 Practice.accdb file can replace this file in a folder
	specific to practice of CCEM 2 functions.
blank.accdb	Used to generate backups/feed forward files.
criterias.accdb	Holds the saved removal/allocation criteria.
pictures.accdb	Holds the pictures of the standard equipments.
Exception.accdb	CCEM-related exception details are logged in this database file.
WHO.accdb	Supports export to WHO Excel tools for cold chain planning.

For best results, create a single CCEM 2 folder on a main computer that is assessable to all appropriate staff. This will ensure that all data is entered into a single CCEM database and that a complete national cold chain inventory database is achieved.

Downloading CCEM 2 from the Internet

Three CCEM 2 ZIP files are available for download at http://www.path.org/publications/details.php?i=1569: CCEM 2.zip, CCEM 2 Practice.zip and CCEM Support Materials.zip

Step 1: Create two folders on your computer or shared network drive:

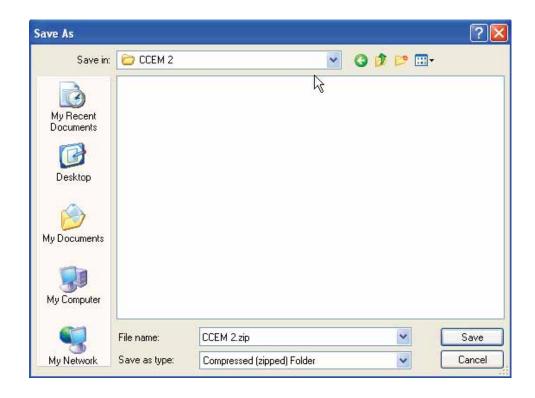

- 1. The first folder can be labelled "CCEM 2" and will contain all six MS Access files for the CCEM 2 tool and all of the CCEM support materials (CCEM User Manual, Cold Chain Equipment Inventory Questionnaires, the Questionnaire Guide and Equipment Identification Guide.)
- 2. The second folder, labelled "CCEM 2 Practice" will be used for the CCEM 2 practice files that contain sample database and must not be used to enter national cold chain equipment data.

Step 2: Save CCEM ZIP files to your computer:

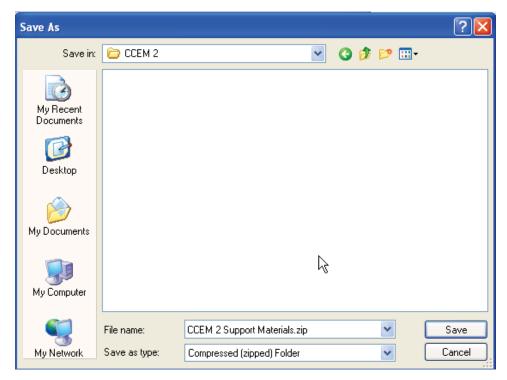

- 1. Click the CCEM 2.zip link and download a zipped folder with the six essential Access files required to operate CCEM 2.
- 2. Follow the on-screen instructions for file download:
 - Click "Save" when asked "Do you want to open or save this file?"

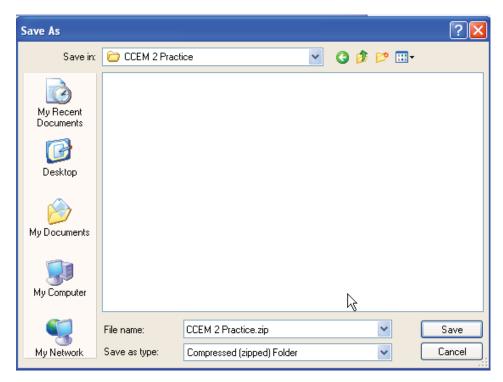

- Choose the "CCEM 2" folder that you created on your computer or shared drive and click "Open."
- Click "Save" to download the self-extracting zip file to the "CCEM Tool" folder.

- 3. Click on the "CCEM 2 Support Materials.zip" link and download to the "CCEM 2" folder this ZIP file containing the following support documents:
 - CCEM 2 User Manual
 - Guide to Cold Chain Inventory Questionnaires
 - Cold Chain Inventory Equipment Identification Guide
 - Health Facility Questionnaire
 - Refrigerator/Freezer Questionnaire
 - Vaccine Cold Boxes, Carriers, and Ice Packs Questionnaire
 - Cold Room Questionnaire
 - Generator Questionnaire
 - Voltage Regulator Questionnaire

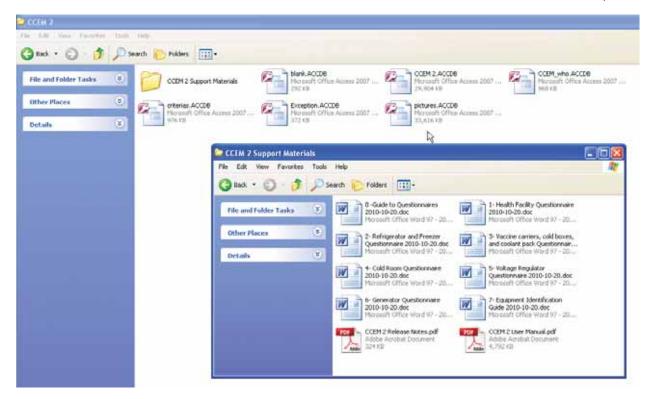

- 4. Once finished, you should have two zip files in the "CCEM Tool" folder on your computer, CCEM 2 Support Materials.zip and CCEM 2.zip.
- 5. Repeat Step 2 to save the CCEM 2 Practice.zip file in the "CCEM 2 Practice" folder.

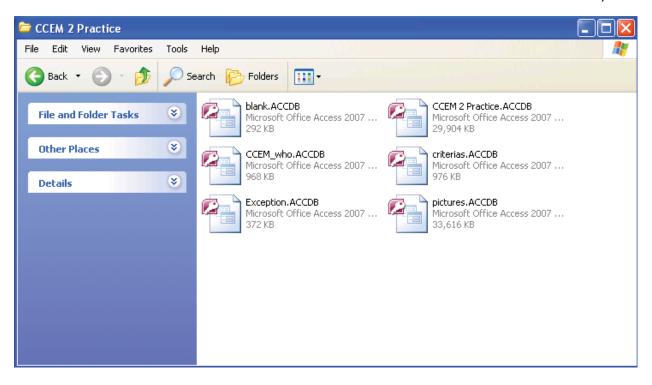

Step 3: Unzip the three ZIP files:

If you do not have an unzip program, visit www.winzip.com.

- 1. Go to the "CCEM 2" folder on your desktop. You will see two self-extracting zip files in the folder
- 2. Double-click on the CCEM 2.zip file
- 3. Click the "Browse" button and choose the "CCEM 2" folder
- 4. Click "Unzip"
- 5. Click "Close" when the unzipping process is complete
- 6. Repeat steps 2-5 for the CCEM 2 Support Materials.zip file, creating a folder within the CCEM 2 folder for these files. Your file structure will look as follows:

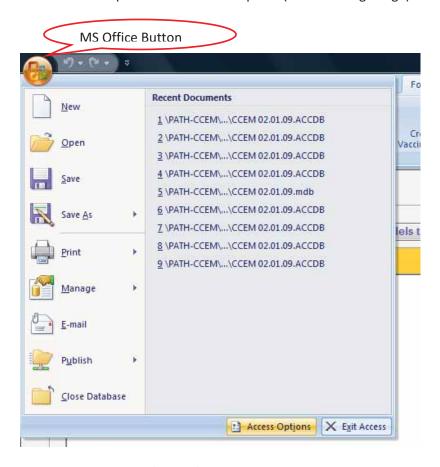

- 7. Go to the "CCEM 2 Practice" folder on your desktop. You will see one self-extracting zip files in the folder, CCEM 2 Practice.zip.
- 8. Double-click on CCEM 2 Practice.zip.
- 3. Click the "Browse" button and choose the "CCEM 2 Practice" folder.
- 4. Click "Unzip"
- 5. Click "Close" when the unzipping process is complete. Your files structure should resemble the following:

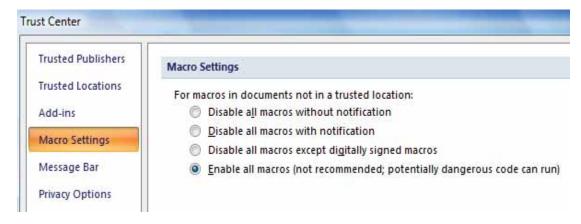

Removing unnecessary security warnings from MS Access 2007

The following setup has to be done for successful functioning of CCEM without being interrupted by security warning:

- 1. Open CCEM 2
- 2. Click the Office button top left of MS Access 2007 menus and Click Close Database
- 3. Click the Office button top left of MS Access 2007 again (see following image)
- 4. Click Access options on the bottom panel (see following image)

- 5. Select Trust Center from left menu and click Trust Center Setting bottom right.
- 6. Select Macro Settings from left menu and select Enable all macro as shown below.

7. Click OK

8. Reopen the CCEM 2.accdb file or CCEM 2 Practice.accdb file
